

**NOW IS THE TIME  
TO LOWER YOUR LAB BILLS**

**With the World's Smallest  
Lens Surfacing System**

**Modified Surfacing Technology**  
"All-in-one" System that produces  
high quality prescription lenses  
without the need for costly  
equipment and skilled personnel.

**Fastgrind**  
International

Modified Surfacing technology from Super Systems has 20 years of time-proven success. "It's easy to use with an "All-in-One" compact design, economical pricing, and digital lens technology. Fastgrind is the right fit for independent practices." High-definition lenses come pre-blocked with a disposable resin block for simplicity and accuracy. Lenses are marked for axis and come calibrated to ensure exact thickness control, providing a precise digital process.

**Start retaining  
customers  
after the exam;  
Stop losing  
sales due to  
service and cost!**

Many optical dispensaries fail to retain customers due to costly lenses & slow delivery. Fastgrind enables ECPs to offer same-day service & pricing that is competitive with large optical chains. Fastgrind fits in a 2'X2' space making it the world's most compact surfacing system. Only needs tap water & standard electric.
