Exploring Key Features of Performance

HPE-990

Speed & Accuracy

Axis Safety

Durability & Poly-Friendliness

Impeccable Drilling

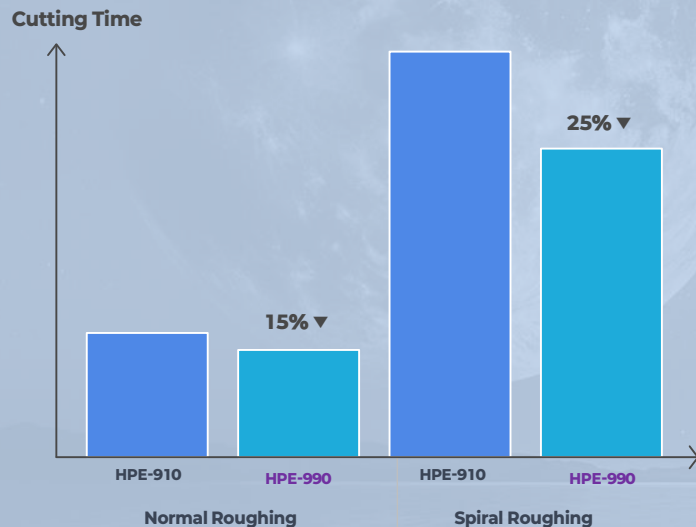

A New Epoch of Edging

Speed & Accuracy

- Higher performance without trading off the accuracy

Cutting Time

- 1) Wheel **motor power** X 1.7
- 2) Wheel **motor speed** X 1.5
- 3) Finishing control X 1.3

Size Accuracy

- 1) 1.3 X higher **precision** in Y-axis control
- 2) Higher **cutting power**
- 3) More stable clamping of the lens

Axis Safety

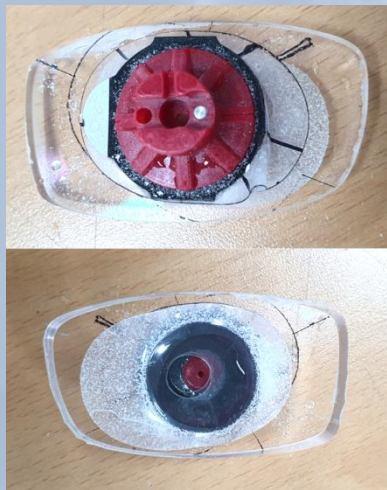

- Test Condition : Poly, Ultra hydrophobic, -8D, **9.0x5.0 eccentric**

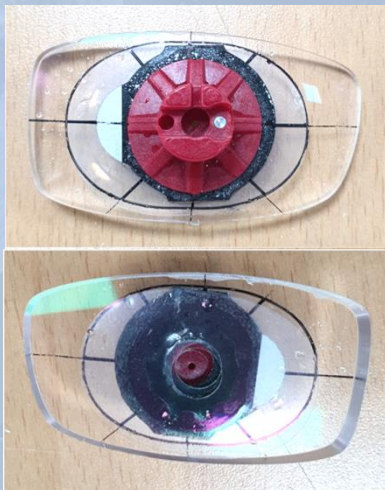

RayBan sunglasses
(A size 59, FPD 74, PD 62)

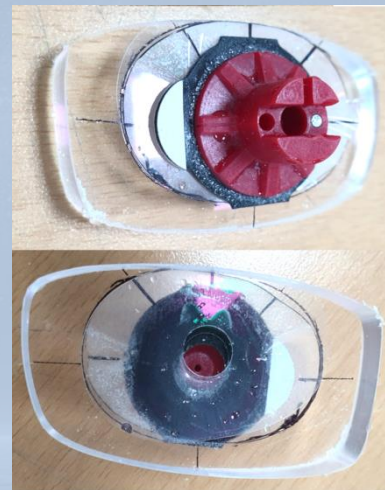

910 (Spiral 2024)

990 (Spiral)

990 (Normal)

Durability & Poly-Friendliness

- Higher accuracy stays longer by the higher durability (Quality of Grooving, Safety beveling and Drilling)

Metal Feeler Tip

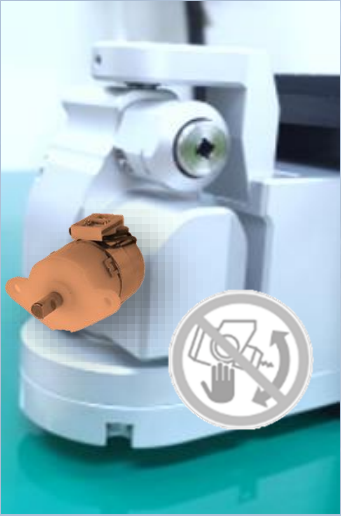

PC Feeling

Impeccable Drilling

Robust Tilting

Secured Spindle

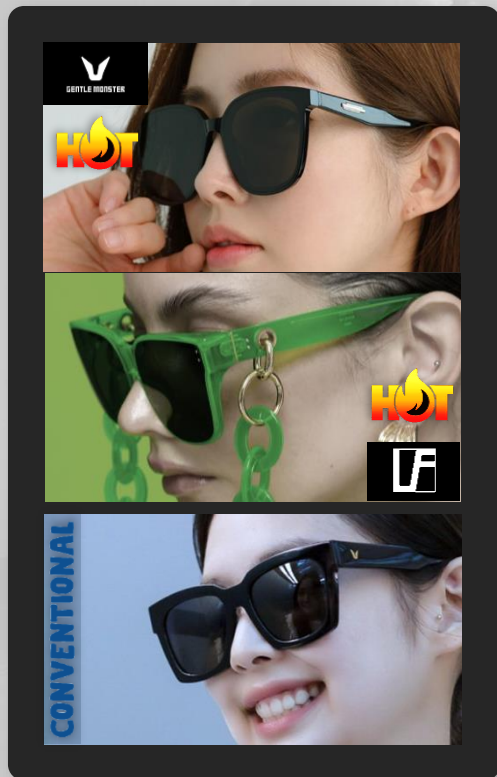

Stuck-Free Design

Exquisite Quality

A New Epoch of Edging

Lens Over Frame Sunglasses

This style is all the rage now

HPE-990 is the first in the universe

That can make the style with Rx Lens

We're Ready!

Summary on New Features

Drill

- Exquisite quality
- Robust tilting
- Secured spindle
- Stuck-free

Feeler

- Highest durability
- Poly-friendliness

SBG

- Faster and
- Higher quality

Bevel

- Perfect up to 9 base (RPDA) with Higher size accuracy

Speed & Accuracy

- Strong and Fast wheel motor
- X 1.3 higher finishing control

Axis

- X1.7 cutting power
- Xtra Large clamp / block

Game Changer

- Deep Step Bevel for 'Lens-Over-Frame' style

HPE-990
